### Profile

I am a postdoctoral computer scientist with over 7 years of full-time research experience and more than 25 publications.

I have strong analytical, programming and communication skills (both oral and written). I have proved my autonomy and proficiency collaborating in multiple international, geographically disperse teams.

I am passionate about learning, and I adapt fast to new subjects and environments. My current research focuses on the following topics:

- Coding of visual content, including remote-sensing and biomedical image data.
- Perceptual and task-oriented data compression.
- Adaptation of coding architectures to domain-specific needs and constraints.
- Compression and image format standards.
